

The Cleanupdate

CLEAN EARTH ADDS TWO NEW BENEFICIAL REUSE SITES

Clean Earth announces the addition of two new beneficial reuse sites to our Northeast offerings – Teterboro Landing in Teterboro, NJ and the Malanka Landfill (15X) Closure Project in Secaucus, NJ. These sites are in addition to our Middlesex Logistics Center (ILR Landfill) beneficial reuse project located in Edison, NJ announced in our previous newsletter. All sites are available now and conveniently located for the NYC and New Jersey markets. The capabilities and advantages of these exclusive sites, combined with our other ten offerings, creates a winning combination to provide Clean Earth customers with a cost-effective plan for today's economy that is quick, convenient, and a quality service to you.

Call Clean Earth to learn more about cost and acceptance criteria **Today!**

Clean Earth, Inc. will Participate in the Technical Symposium on Environmental Remediation presented by New York Society of Architects

On March 25, 2010, Mr. Averil Rance, Vice President of Environmental Health & Safety with Clean Earth, Inc., will participate in a technical panel to discuss the topic of *Environmental Considerations in Architectural & Engineering Practice and the Role of the NYC Mayor's Office of Environmental Remediation (Manhattan, NY)*.

Mr. Rance has more than 20 years of experience in Environmental, Health & Safety and joins a panel of technical experts to discuss relevant programs, constraints, opportunities, and requirements for today's design professionals to effectively deal with the growing universe of environmental regulations. Specifically, Mr. Rance will lead a discussion on professional services provided to assist Environmental Remediation of Brownfield projects; processing of contaminated soil, dredge sediment and hazardous waste, operations and management techniques that impact the construction process, regulatory compliance, etc.
