

Generator: _____ MGT: _____

Material / Contents: _____

If empty, is the cylinder purged or devalved? _____

EPA Codes: _____

Physical Dimensions of Cylinder in Inches - Height: _____ Diameter: _____

Volume of Cylinder: _____

Visual Inspection:

*** Photos may be requested. If cylinders are damaged, photos will be required ***

Rusty	<input type="checkbox"/> Yes <input type="checkbox"/> No	Valve Attached	<input type="checkbox"/> Yes <input type="checkbox"/> No	Empty	<input type="checkbox"/> Yes <input type="checkbox"/> No
Pitted	<input type="checkbox"/> Yes <input type="checkbox"/> No	Valve Broken (visual)	<input type="checkbox"/> Yes <input type="checkbox"/> No	Mfr. Label	<input type="checkbox"/> Yes <input type="checkbox"/> No
Dented	<input type="checkbox"/> Yes <input type="checkbox"/> No	Valve Bent	<input type="checkbox"/> Yes <input type="checkbox"/> No	Bell Cap	<input type="checkbox"/> Yes <input type="checkbox"/> No
Bulged	<input type="checkbox"/> Yes <input type="checkbox"/> No	Valve Corroded	<input type="checkbox"/> Yes <input type="checkbox"/> No	PIH (capped)	<input type="checkbox"/> Yes <input type="checkbox"/> No
Abraded	<input type="checkbox"/> Yes <input type="checkbox"/> No	**CGA Number: _____			

** The CGA number is a stamped number on the valve body that is used to identify the contents or class of material (ex. CGA 540 is oxygen)

Markings

Once a cylinder passes the visual inspection, all necessary information should be obtained to ensure the contents are as marked. Cylinders must be surveyed to acquire as much information as possible. If a cylinder is in poor condition or missing the manufacturer's label, the cylinder markings listed below are needed.

Typical cylinder markings:

DOT-3A1800 DOT-3A1800-1234-XY
 1234 **OR** AB 5-95
 XY
 AB 5-95

Key:

DOT-3A = Specification Number _____
 1800 = Service Pressure _____
 1234 = Serial Number _____
 XY = Symbol of Manufacturer _____
 AB = Inspector's Mark _____
 5-95 = Date of Test _____
